

HOU-WM6001 Metal detector

Features:

- Single zone
- LEC Display
- Easy to carry
- frequencies.
- Passenger and alarm counting function

|--------------------|--|
| Outer frame : | 2200mm(H) X 800mm(W) X 450mm(D) |
| Channel size: | 2010mm(H) X 700mm(W) X 450mm(D) |
| Weight : | About 50kg |
| Work environment : | -20- +45 ℃ |
| Complied standards | GB15210-94 |
| Power supply: | 220V,AC |
| Power: | <30W |
| Count detecting | Infrared sensor,mechanical anti-interference |
| Sensitivity: | 99 levels,adjustable |

Product Specifications:

- **Model : HOU-WM6001**

Description:

Product Process: Using imported synthetic material, once suppressed by the special arts and crafts made of moisture, fire.

Infrared technology: through an infrared sensor, mechanical interference ability.

Adjustable area sensibility: Between the self-regulation can be 0-99 sensitivity, according to the user demands the removal of the actual sensitivity and carried by the body jewelry, belt buckle, metal zipper and so on.

Statistical functions: Intelligent and Statistics by the number of personnel and alarm times.

Easy to operate: Operation panel for the thin-film panel, high-brightness display panel can directly display alarm area, precise location of the instructions have been exploratory items, and have sound and light alarm simultaneously.

Harmless to human body: On the human body, the heart pacemakers, pregnant women, magnetic floppy disks, tapes, video tapes and other sound.

Easy installation: XLD Series metal detector gate is a combination of design, easy installation and removal, operating instructions easier to understand.

Applications:

Hotel, railway/bus/subway station, stadium, exhibition hall, etc
